

# Common Findings in Concrete Assessments:

## ASTM C1077

On season 4 episode 26 we discuss common nonconformities for the below concrete standards. [LISTEN HERE](#) or go to [podcast.aashtoresource.org](http://podcast.aashtoresource.org).

These findings are not ranked, nor do all laboratories receive these, but are some of the most common nonconformities seen in laboratories participating in our programs.

### General Accreditation Requirements

Facilities

Equipment

Personnel

Quality Management System

### ASTM C1077

Agencies Testing Concrete and Concrete Aggregates for Use in Construction and Criteria for Testing Agency Evaluation

- No certifications
- No PE
- Reporting issues
- Organizational chart out of date or not presented
- No corrective actions on low PSP ratings
- Standards are out of date or not presented
- Procedures missing from QMS
- Records missing

For a finding to be resolved, the laboratory must submit evidence that thoroughly addresses all aspects of the nonconformity/finding.
