

Participants in the 2025 Soil Classification and Compaction Proficiency Sample Program,

The 2025 Soil Classification and Compaction Proficiency Samples 191 and 192 are currently being processed and packaged for shipping. Please take note of the following dates and deadlines associated with these samples:

Shipping Date: March 6th, 2025

Immediately after the shipping date, please log in to the AASHTO re:source website to track your packages. From the "My Lab" page, click "Packages" in the left-hand column of the page. Please note that the packages are not shipped simultaneously. Delivery of your packages will most likely occur on different days and may not arrive in order (Box 2 may arrive before Box 1).

Please be aware that the Shipping Contact on file will receive a FedEx Shipment notification email from TrackingUpdates@FedEx.com containing tracking information. To ensure receipt of the shipment details, kindly add TrackingUpdates@FedEx.com to your contact list and make sure your Shipping Contact information is up to date in our system.

Upon receipt of the samples, please open the boxes and ensure that all contents are included. If the samples are seriously damaged or missing a component, please notify us immediately and we will send replacements. If you do not, we cannot guarantee that samples will be available with enough time for testing to be completed.

The outside of the sample boxes are labeled samples 191(A) and 192(B). The bags inside the boxes are labeled only (A) or (B). The bag labeled (A) is sample 191. The bag labeled (B) is sample 192.

Datasheets, instructions, and SDSs will be available for this sample on our website beginning on March 6th, 2025. They can be found by using the following link:

<http://www.aashtoresource.org/psp/datasheets-and-instructions>

Non-Receipt Date: March 20th, 2025

If you have not received the samples by the non-receipt date or if the samples are seriously damaged, or missing a component please notify us immediately and we will send replacements.

Closing Date: May 1st, 2025

We encourage you to submit your results online, as soon as possible. This enables you to receive instant confirmation of data submitted and revise data if needed. Test results received after the closing date will not be included in the final report.

Final Report Date: May 15th, 2025

AASHTO re:source will provide a final report approximately two weeks after the closing date. Individual laboratory reports will be provided by logging on to the AASHTO re:source website. Laboratories will be notified by email when the final report becomes available.

Of course, confidentiality of individual laboratory results will be maintained. However, general information regarding the round of testing, such as statistical summary tables and Youden scatter diagrams associated with the analysis of data, will be provided to the public on the AASHTO re:source website.

New Test Method(s):

None.

Other Information:

Soil Resistivity (T288/G187), Determining pH of Soils (T289, D4972), Determining Water-Soluble Sulfate Ion Content (T290), and Determining Water-Soluble Chloride Ion Content (T291) have been removed from this sample and are now in the Soil Corrosivity and Chemistry (SCC) Sample.

A complete sample schedule is available online:

<http://www.aashtoresource.org/psp/schedule>

Please contact AASHTO re:source at psp@ashtoresource.org or call 240-436-4900 if there are questions.

Sincerely,
John J. Malusky
Program Manager
